Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17 and 19-20 drawn to registering a user to the system, classified in class 705, subclass 1.
 - II. Claim 18, drawn to introducing or recommending new user to the system, classified in class 705, subclass 14.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as recommending a new user to use the introduction system. See MPEP § 806.05(d).
3. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as the procedures for registering a user to the introduction system. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. Since the examiner knows from past experience that an election will not be made

by telephone, this restriction is proper under MPEP 812.01.
